

PRIORITY SITE SURVEY

WI-FI ISSUES ARE SLOWING THE OPERATION? FIND THE REAL CAUSE FAST.

Axsera's Site Survey helps pinpoint what is breaking coverage, roaming, and device performance on site. We review the environment, isolate the root cause, and give your team a fix plan.

✓ WHAT YOU GET

- ✓ RF heatmap and site findings
- ✓ Root-cause analysis
- ✓ Cabling and switch port verification
- ✓ Prioritized fix plan
- ✓ Executive summary for decision-makers

Q HOW THE SITE SURVEY WORKS

- 1 Assess Site**
We review your floor plans, client device requirements, and existing infrastructure constraints.
- 2 Diagnose Root Cause**
Identify issues tied to coverage, roaming, interference, cabling, or configuration.
- 3 Prioritize Fix**
You receive a clear action plan detailing with the fastest path to stable Wi-Fi.

🛡️ WHY AXSERA

📶 Root-Cause Focus

We isolate the exact layer 1, 2, or 3 cause rather than treating symptoms.

🔧 Wi-Fi + Cabling

We test and fix the whole stack, from the access point down to the switch port.

🏢 Complex Environments

Deep expertise in complex RF environments.

🔧 Vendor-Agnostic

Unbiased diagnostics for Cisco, Aruba, Extreme, Meraki, and more.

⚠️ WHEN TO BRING AXSERA IN

- > Devices dropping connection during handoffs
- > Dead zones and roaming issues
- > Failing post-install performance
- > Interference in dense environments
- > A recent expansion made Wi-Fi worse

STOP GUESSING. GET THE NETWORK FIXED.
